

ATTACHMENT 3

**Lefo Institute - Examination report of 21.05.2004 carried out of
Samples CARICOL 3105 and Papaya 3106 April 2004**

Packing: Twist-off-jar
Sent by: Botanical Products International
Received: 26.04.04
Ordered by: Mr. Brenner
Start of examination: 26.04.04
Examination terminated: 21.05.04

Method of examination:

The Papain-activity was defined after Anson by means of Papain-standard rules. (pH 4,1, 31°C, 20 minutes).

The used Papain-standard had an activity of 3450 units/g (after Anson pH 7,5, 35,5°C). Fructose was determined enzymatically by means of the UV-test.

Result of examination:

Sample:	Papain-activity:	Fructose:
3105	180 units/g	6,0 g/100 g
3106	48 units/g
